PERMANENT HAIR... PERMANENT CONFIDENCE

Over 10,000 Satisfied Patients

10 REASONS

Why You Shouldn't Delay Your Hair Restoration Surgery

Hair loss not only stunts a person's hair growth process, but their confidence as well. There are several reasons why you shouldn't delay your hair restoration surgery.

In men's cases, hair loss is a genetic condition known as male pattern baldness. Hair follicles are sensitive to the male hormone DHT, which results in the shortening of the hair cycle's growth phase. Female hair loss is, in most cases, a result of medical conditions and diseases. At Physicians' Hair Restoration Center, our team of professionals are dedicated to providing clients with superior hair transplant surgery.

1. Enjoy Hair Growth Sooner

The sooner you receive your hair transplant surgery, the sooner you can enjoy the growing hair. At PHRC, patients see hair growth within 90 - 120 days of the surgery and between four - eight months, most of the grafted hair will have grown back. 40% of the patients that receive the hair restoration treatment from Dr. Puig notice significant hair growth within 45 - 90 days. Begin your hair restoration process today and reap the benefits of natural-looking hair.

2. Avoid Family History Hair Loss

Individuals who know their family's history with hair loss know what the future will bring and can avoid the bald appearance during the evolution by contacting PHRC for a hair restoration surgery.

3. Lower Risk in Hair Transplant Procedure

Although hair restoration is a low-risk surgery, the younger the patient is the lower the risks are. Therefore, the sooner a patient begins the hair restoration process and schedules a surgery, the safer it is for the individual.

4. **Patients Won't Have to Hide or Change Their Appearance**

By beginning the hair restoration process, patients won't have to spend time and money altering their appearances or avoid going out in public places. They can enjoy natural-looking, age-appropriate hair in just a few months.

5. **Restore Self-Confidence**

Hair restoration restores self-confidence, why not enjoy that sooner? Getting your hair back will help you feel like you have gotten your life back.

6. **Hair Restoration Technology is at its Best**

The current hair restoration technology is the best it has been in 50 years. There have been minimal changes in the last 5 years, and contemporary technologies always produce natural-looking results. The advanced state-of-the-art techniques and technology provide patients with age-appropriate, minimal scarring, colored hair. At PHRC, [Dr. Puig](#) ensures that patients experience little to no pain during and after the hair restoration procedure.

7. **Price of Hair Restoration**

The price will never be better, especially when looking for an experienced surgeon. PHRC's philosophy is "patients before profits" and Dr. Puig offers solutions for several different hair restoration cases by providing patients with cost-effective options.

8. **Avoid Potential Additional Hair Loss**

Long-term treatment planning eliminates the risk of any additional hair loss in the future.

9. **Improvements on Hair Restoration Contemporary Post Op Care**

The hair restoration contemporary post operative care has dramatically improved in the last few years. For most patients, the healing and recovery time of the hair transplant procedure is only 1 - 3 days. If the post-operative instructions are followed carefully and accordingly, scarring and graft crusts will disappear within a week after surgery.

10. **Long Lasting Hair Restoration**

To date, there is no other medical treatment that provides long lasting, high-quality, natural-looking hair restoration results.
